

# Application Process

Investing Women Angels are now inviting founders to apply to pitch on our dedicated application portal [dealum](#).

The questions on the portal will ensure you provide all the information our screening group requires to consider your application for pitching. This includes information on:

- > Your business model,
- > Your market,
- > Your intellectual property,
- > Your financial projections.

We are particularly keen to hear from businesses that have:

- > An innovative technology or business

model > A founding team rather than an individual

> Validation of the product and/or business model

> A clear understanding of the route to market for the product

> A business that is scalable beyond the Scottish or UK marketplace

> An indication of either SEIS or EIS status.

Our screening group will review all applications and we will contact you to let you know if you have been successful or if we require more information.

Please note, in line with most angel groups, we charge founders a 5% admin fee on any investment successfully raised from our group.
